

CompTIA Cloud+ Certification Training (5 Days)

Description

The CompTIA Cloud+ course will help the student with the knowledge and best practices required of IT practitioners working in cloud computing environments and who must understand and deliver cloud infrastructure.

Course Objectives: Upon successful completion of this course, students will be able to take the CompTIA® Cloud+® Exam.

Target Audience: This course is intended for experienced computer support professionals with a working knowledge of computer hardware, software, and operating systems to prepare for the CompTIA® Cloud+® (Exam CV0-001), or who wish to increase their knowledge and understanding of cloud technologies and acquire the required skills to prepare for a career in that field.

Prerequisites: CompTIA recommends that candidates have the CompTIA Network+ and/or CompTIA Storage+ certifications; at least 24-36 months of work experience in IT networking, network storage, or data center administration; and familiarity with any major hypervisor technologies for server virtualization.

Course Topics

- Cloud Computing Concepts, Models, and Terminology
- Disk Storage Systems
- Storage Networking
- Network Infrastructure
- Virtualization Components
- Virtualization and the Cloud
- Network Management
- Performance Tuning
- Systems Management
- Testing and Troubleshooting
- Security in the Cloud
- Business Continuity and Disaster Recovery
