

Introduction to Dreamweaver Creative Cloud (2 Day)

Course Description

This Dreamweaver CC training class is for people new to Dreamweaver. You will learn to create HTML- and CSS-based websites without writing any code. Although HTML and CSS are not prerequisites for the class, if you have some experience with them, you will have a better appreciation of the power of Dreamweaver.

Our instructor-led online classes are conducted in the Creative Cloud 2014 version of the software. Your instructor will point out the minor differences between versions where they exist. For our custom instructor-led online and onsite classes, we use the version of the software you use in your office.

Class Goals

- Learn to define a site in Dreamweaver.
- Learn to format text with Dreamweaver.
- Learn to work with lists and nested lists.
- Learn to add images, image maps, and rollover images.
- Learn to work with tables.
- Learn to format pages with CSS.
- Learn what's new in CC 2015.
