

Adobe Photoshop CC Advanced Training (1 Day)

Adobe Photoshop is a premier graphic creation tool widely used by graphic designers, illustrators, and photographers. This advanced course enhances your skills in creating and editing images with sophisticated techniques. Engage in hands-on activities that amalgamate these techniques to produce compelling visual effects. This training is also an integral part of the preparation for the Adobe Certified Professional (ACP) in Visual Design Using Adobe Photoshop exam. It is ideal for professional or amateur photographers looking to leverage Photoshop's powerful features to improve, modify, and organize their photos, as well as for those aiming for certification in Visual Communication with Adobe Photoshop.

Course Benefits

- Use basic features of Adobe Photoshop.
- Create raster images using brushes, gradients, and tool presets.
- Apply vector paths, shape drawing tools, type, and type special effects.
- Utilize advanced layer techniques with masks, filters, layers, and smart objects.
- Automate tasks using actions and batch processing.
- Edit video with timelines, transitions, graphics, titles, and animation.
- Set project requirements by identifying the purpose, audience, copyright rules, and project management tasks.

Class Prerequisites

Experience in the following *is required* for this Photoshop class:

- Identify the basic components of Adobe Bridge and the Photoshop workspace.
- Define image size and resolution.
- Add and modify Photoshop layers.
- Use tools to select, crop, and move images.
- Work with image adjustment properties to correct and retouch photographic images.
- Open and modify an image in Adobe® Camera Raw.
- Prepare images for print and web.
